CAREER OBJECTIVE

To secure a DevOps Engineer role where I can apply my knowledge of Linux systems, cloud platforms, automation, CI/CD pipelines, and system administration to build reliable, scalable, and efficient solutions. I aim to contribute to seamless software delivery, infrastructure optimization, and continuous improvement while enhancing my technical expertise and problem-solving abilities in a dynamic organization.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering 2021–2025
Muffakham Jah College Of Engineering And Technology, Hyderabad CGPA: 8.33

CERTIFICATIONS & TRAINING

DevOps & Python Full Stack Training QSpiders, Hyderabad · Jan 2026 – Present
Linux Server Administration, AWS, Azure, Jenkins, CI/CD, Docker, Kubernetes, Ansible, Terraform, Networking, Monitoring

Linux Essentials – Cisco Networking Academy Jul 2023

Google Cloud Computing Foundations & Generative AI – Google Developer Groups, MJCET Nov 2023

TECHNICAL SKILLS

OS: Linux, Windows, Ubuntu, Amazon Linux
Cloud & DevOps: AWS (EC2, S3, IAM, AMI, VPC, Lambda, RDS, DynamoDB, CloudFront, CloudWatch), Git, GitHub, GitHub Actions, Maven, Jenkins (CI/CD), Docker, Kubernetes, Ansible, Terraform
Networking: VPC, Subnets, Security Groups, Route Tables, DNS, Load Balancing (ALB), NAT Gateway, Internet Gateway
Scripting: Bash / Shell Scripting
Programming: Python, C, Embedded C
Web: HTML5, CSS, JavaScript
Soft Skills: Problem Solving, Self-learning, Adaptability, Communication, Presentation

PERSONAL PROJECTS

- AWS Auto Scaling & Load Balancer with NGINX**
 - Built multi-AZ architecture (EC2, ALB, ASG) achieving ~99.9% uptime with ~40% better performance; configured NGINX reverse proxy and CPU-based auto-scaling, cutting response time by ~30% and manual effort by ~60%.
 - Tech:** AWS (EC2, ALB, ASG), NGINX, Linux, CloudWatch.
- CI/CD Pipeline for Maven Application – Jenkins & GitHub**
 - Built end-to-end CI/CD pipeline integrating GitHub with Jenkins for automated build, test, and deployment of a Java Maven app; configured Maven stages and Gmail SMTP notifications for real-time status updates.
 - Tech:** Jenkins, GitHub Actions, Maven, Java, Linux, CI/CD.
- VALOR – Vision-based Autonomous Location & Obstacle-avoidance Robot** (Major Project)
 - Autonomous vehicle prototype for Indian roads; achieved 45% better obstacle detection via YOLO + GPS and 40% faster response by integrating Jetson Nano with ESP32 motor control on Ubuntu Linux.
 - Tech:** Python, OpenCV, YOLO, Jetson Nano, Ubuntu Linux, GPS, CNN, ESP32.
- Face Recognition Attendance System**
 - Real-time face recognition using OpenCV improving attendance accuracy by 48%; automated cloud logging to Firebase reduced manual processing by 42%.
 - Tech:** Python, OpenCV, Face Recognition Library, Firebase / MySQL.

EXTRA CURRICULAR ACTIVITIES

- Tech Lead, T-SIG** (Technology Student Interest Group), MJCET, Hyderabad 2023–2025
 - Conducted workshops on robotics, computer vision, and programming; coordinated club activities to enhance hands-on technical learning.
- Secretary, IEEE MTTS**, MJCET Jul – Oct 2024
 - Organized technical talks on RF & communication systems; managed events, documentation, and student coordination.
